 Nacogdoches, TX 75963-1375
 Office-(936)-569-8879
 Fax -(936)-569-8951

The Annex building is up and running and our lab techs are enjoying all the extra testing space!

If you find yourself needing a Total Coliform result sooner (boiled water notice. Construction, well workover) please request our 18 hour analysis. We have media to allow you this 6 hour reduction!!

Changes for the new year!!

Shes's back!!! After leaving in 2009 to serve a year over seas Jamie Vulpo has made a safe trip home back to East Texas and back to Eastex Environmental. Also there are 2 new faces in Nacogdoches. Please welcome Matt Romig our newest lab tech and Ashley Spears our new secretary.

Sample Custodian REQUESTS

Please make sure that ALL forms are filled out completely. This includes Company name, address, phone#, samplers name, project name, date and time. Thank you!

As of July 1st 2011 the new TNI standards are in effect. We MUST check your Total Coliforms for chlorine BEFORE we run the analysis.

Chain of Custody should be with every sample brought to the lab. Their completion and accuracy will assist in correct reporting later.

Our Routes

Mon- Lufkin
Tues- Toledo Bend/ Crockett/ Gun Barrel City
Wed- Lufkin
Thurs-Karnack/Center/ Jasper/Garrison/Crockett
Fri-Lufkin

IMPORTANT NOTE:

Fun Facts

The Egyptians were the first people to record methods for treating water. These records date back more than 1,500 years to 400 A.D. They indicate that the most common ways of cleaning water were by boiling it over a fire, heating it in the sun, or by dipping a heated piece of iron into it. Filtering boiling water through sand and gravel and then allowing it to cool was another common treatment method.

Reminder:

When paying your invoice please send in your **yellow** copy with your payment or reference your customer ID.
